HAREL INSURANCE CAPITAL REQUIREMENTS - SOLVENCY

(NIS BILLION)

- It is emphasized that the model in its current format is extremely sensitive to changes in market and other variables
- Capital changes from December 2018 to the initial publication date of the solvency ratio (July 2019) would increase the capital surplus by NIS 343 million to NIS 2,255 million, and raise the solvency ratio to 123%.
- The Company believes that the impact of the circular "Amendment of the Provisions of the Consolidated Circular on the measurement of liability - Update of the demographic assumptions in life assurance and updated model for improved mortality for insurance companies and pension funds" on the solvency ratio of Harel Insurance will be up to NIS 400 million, and that even after this, Harel Insurance will still have a capital surplus without taking the transitional provisions into account
